AMS2430T: Shot Peening, Automatic - SAE International

Shot Peening, Automatic AMS2430 This specification covers the engineering requirements for automatic peening of surfaces of parts by impingement of metallic shot, glass beads, or ceramic shot. To induce residual compressive stress in surface layers of parts, thereby increasing fatigue strength and resistance to stress-corrosion cracking but usage is not limited to such applications.

AMS2430: Shot Peening, Automatic - SAE International

Army released a document titled "Shot Peening of Metal" (2) to control the process in 1944,. SAE then introduced its version of shot peening process control in 1948 with its release of AMS 2430. SAE then published two documents to control the process, "Test Strip, Holder and Gage" (3) and "Use of Test Strip for Shot Peening" (4) in 1952.
