

the ignition system in pdf

Magneto ignition system is mainly used in 2-wheelers, kick start engines. (Example, Bajaj Scooters, Boxer, Victor, Splendor, Passion, etc.). In this case magneto will produce and supply current to the primary winding.

Mechanical ignition Most four-stroke engines have used a mechanically timed electrical ignition system. The heart of the system is the distributor which contains a rotating cam running off the engine's drive, a set of breaker points, a

• If the ignition control module is receiving a changing signal from the crankshaft position sensor, it must be capable of switching the power to the ignition coils on and off. • Remove a coil or coil package, and with the ignition switched to on (run), check for voltage at the positive terminal of the coil(s).

Electronic ignition The disadvantage of the mechanical system is the use of breaker points to interrupt the low voltage high current through the primary winding of the coil. this distributor-based system is not greatly different from a magneto system. and poor sparking can lead to lower engine efficiency.

It is in 1911 that he developed the first electrical ignition system (or at least the design concepts that lead to that invention). These early patents are hard to trace, but a little research shows Kettering invented the "engine, starting, lighting, and ignition system" (Patent 1171055 featured here in PDF).

The purpose of the ignition system is to generate a very high voltage from the car's 12 volt battery, and to send this to each sparkplug in turn, igniting the fuel-air mixture in the engine's combustion chambers.

209 is required, the switching device opens. Current flow stops abruptly, causing the magnetic field surrounding the coil to collapse. See Figure 10-26.

Ignition systems even in its simplest form represent electrical system which produces voltage waveforms in a form of pulses in complex shape. For the diagnosis of these systems is necessary to use such diagnostic systems, which allow to record these waveforms for next analysis.
